

NobleGen

YOUR RELIABLE PARTNER IN GAS & LIQUID GAS HANDLING

WARRANTY

This warranty applies to Gas Generators and associated parts (the equipment) manufactured and supplied by Wirac Automation Ltd.

Use of the Gas generator without the recommended inlet air quality or genuine spare parts will expressly invalidate the warranty.

Should the equipment be defective as to materials or workmanship, Wirac Ltd warrants that it will remedy such a defect. Where the equipment is a Gas Generator the warranty period will be 24 months from date of commissioning or 30 months from date of dispatch, whichever ever is earlier, provided such commissioning is carried out in the way described within the instruction manual. Should any defect occur during the warranty period and be notified in writing to Wirac or its authorised distributor within the said period, Wirac will, as its sole option, remedy such defect by repair or provision of a replacement part, provided that the equipment has been used strictly in accordance with the instructions provided with each item of the equipment, and has been stored, installed, commissioned, operated and maintained in accordance with such instruction and with good practice. Wirac shall not be under any liability whatsoever under the warranty if, before giving notification in writing to Wirac as aforesaid, the customer or any third party meddles, interferes, tampers with or carries out any work whatsoever (apart from normal maintenance as specified in the said instructions) in relation to the equipment or any part thereof. Wirac will hold no liability for any damage to third party equipment, processes, goods or materials caused by a defect in a NobleGen gas generator.

Any accessories, parts and equipment supplied by Wirac but not manufactured by Wirac shall carry whatever warranty the manufacturer has given Wirac, provided it is possible for Wirac to pass on such warranty to the customer.

To claim under the warranty, the goods must have been installed and continuously maintained in the manner specified in the operators handbook.

Where the equipment is sold outside the UK mainland direct to the end user the warranty will cover parts only replacement, however if claiming a warranty repair the Generator must be returned to Wirac UK for inspection / repair.

Any substitution of parts not manufactured, supplied or approved by NobleGen will invalidate the warranty.

5 YEAR EXTENDED WARRANTY: The 5 year warranty on parts is subject to the warranty as mentioned above in accordance with Wirac Automation Ltd standard warranty policy. For UK customers only (end user must be located within the United Kingdom) there is an option to take out a **total care maintenance agreement** for your equipment which must be purchased with the equipment. This agreement covers the user for the annual service visit, parts and warranty for up to 5 years from manufacture. Please contact Wirac Automation Ltd for further information and costs.

Wirac Ltd has a continuous policy of product development and although the company reserves the right to change specifications, it attempts to keep customers informed of any alteration. This publication is for general information only and customers are requested to contact our sales department for detailed information and advice on a product's suitability for a specified application. All products are sold subject to the company's standard conditions of sale.
